Harm to People & Pets

The Federal Communications Commission (FCC) who

supposedly regulates the safety of wireless tech. was recently sued

by Robert F. Kennedy, Jr's Firm and Environmental Health Trust.

The FCC LOST and a Federal Appeals Court Judge rebuked them for "ignoring the studies

showing harm from wireless tech". The FCC was ordered to

immediately pay for the 11,000 pages of evidence showing harm!

Prof Mouritsen said that migratory birds flying over towns and cities, where there are more homes and businesses that use electrical devices, would be most affected - and they would probably resort to back-up navigational systems."

These meters are not "wireless" but they are "digital" and have some known and undesirable traits such as deadly readings coming from electric outlets into serviced homes & public buildings. They're being FORCED on SO CALLED "members" by a utility CORPORATION who likes to be called a "member owned COOPERATIVE". According to reports by locals they also lock said "members" out of public meetings and control who gets on the board and then tell those members what THEY voted for by these "rigged" representatives. how is it that the members would FORCE undesirable technology onto themselves? Where's that INFORMED CONSENT?

As well, this power line communication system being used here is known for producing a 24/7 high-pitched tone which many hear in the area. Locals say it began immediately after installation of these new meters. Very dangerous Stetzer meter readings are being found in many homes and public buildings.

There is MUCH to know about this system. The explanation that power lines were designed to carry current and this system now has them also carrying data is reportedly the reason for the 24/7 squeal in the air here.

This review is an attempt to provide a critical appraisal of the available reports regarding the impacts of these radiations on plant development and the underlying physiological, biochemical, and molecular mechanisms involved.

Here, we propose that the main entry point for the biological effects of EMF-r corresponds to an increase in ROS metabolism and cytosolic calcium that leads to various cellular responses including changes in gene expression and/or enzymatic activities, which could ultimately result in immediate cellular alterations or delayed plant growth. This may constitute a new perspective in the interpretation of plant responses to EMF-r exposure. Understanding the impacts of EMF-r and the inherent

I wrote down a message **GOD** spoke to me.

"Isaiah 54 Shall Apply" is what it read.

I noted it in a first adult journal and then I went to bed. 28 years went by before someone brought this back to mind.

When I went back to read it, I was amazed by what I'd find.

It was like reading a story of where all I had been.

It even showed my divorce, which I didn't see back then.

I recalled one idea that I'd "be moved to a place with a gemstone foundation".

So He could tell us a story and help us find His way.

It's been a challenging but fruitful journey, an alternative path I took. God then insisted I write an extensive book.

It had been out about a year when the story took a radical turn. There were urgent things He needed to show me - we have a lot to learn.

Our launch of wireless technology is the subject that's caught His eye.

If we don't stop this a lot of things will try!

Healing EMF Sensitivity

Many things can cause high copper in the body and exposure to EMR can't be eliminated as a possible contributing cause. Stress, diet... Then high copper to zinc ratios can make you EMF sensitive. Copper can be lowered by correcting the zinc to copper

"But wait a minute" my mind ran ahead.

"How many days between those two?" I said.

I could hardly believe the answer when it was shown to me.

3 weeks and 3 days later I turned 33.

One step further, as I look around. Another set of 3's is what I found.

February 2023 helps me to know. We arrived here 3 years and 3 months ago.

You can't access medical care or dental care... and the most disheartening of all is that the world doesn't seem to care. Our illness is very inconvenient for all the plans in place. Damn us and the bees. Notice: Wireless has not made us better humans!

IS THIS OKAY WITH YOU?

My Dad was a Master Electrician who built the Consumers Energy building on Parnell Rd in Jackson. he didn't put their substations next to the CEO's office he put it out in the parking lot....My Dad also worked on the St. Lawrence Seaway Electrical Grid in the 50's. He also formed the Electrical Union for Goodyear Tire and Rubber in the mid 1940'sI have spoken with Dr. Richard Tell Ph.D who tested 150 Smart Meters for ITRON, INC while living in Harbor Springs, MI and their City put six Smart meters on our quadrangle in Feb 2010 and we all got the side effectsso I talked to ITRON 3 times and Dr. Tell one hour he said ... Legislation has to be written to put a limit on WIF/EMF's so they abide by it ... FCC

Never do they test for human illness from these WiFi devices like they did or would for Wired Electricity. IBEW makes sure what they who put those wires up are trained and abide by the IBEW rules and regs...and they should be Union electricians too ... Protecting Human lives from harm.... While they KNOW ,the MPSC Electrical Engineer told me backin 2010 --pulsating Radio and Microwaves into a persons body will unravel the DNA and cause boiling of the cells and bursting them and cause cancers of the brain or testicles or lower the sperm rate and cause many health problems .

Dr. Tell admits...meters were only tested for functionality, not tested on humans or animals

My electric meter is communicator hub level all the time. I am so sleep deprived and you would not believe how bad my tree is the backyard is looking. The meter and the big new LED street light along with 4 and 5G next door are killing us both. Anyway, take care.

not really. I had a naturopathic Dr and sever others say it was Lyme's disease but never got checked. I was addicted to sugar most my life and change my diet many years ago and I am grateful for life. I am sure I am very sensitive to emf. I had 2 microwave ovens + both new) go out in one year. God was speaking to me. A few years ago I had to go to the hospital and they made me stay the night because my blood pressure would drop while laying down. Before I came I had horrible headaches at night and heart palpitations. I asked everyone why it always happens in my bed. Well I had 2 cell phones charging next to me in the bed. And I had them in my bed at the hospital. I had no

bad brain fogs, memory issues and headaches. I noticed it would happen in stores like Publix but couldn't figure that out. There is a cell tower 1 Mike from me.

I have been useless and unavailable for over a year. I am very tired. I am sensitive to a lot of things even medications. Could be my blood type. I am O negative and my brother too. He has a lot of issues also. Skin sensitivity and burning, fatigue and brain fogs too. At least he can work though. Thank God for my Social security check and my house is paid for. I need to move away...

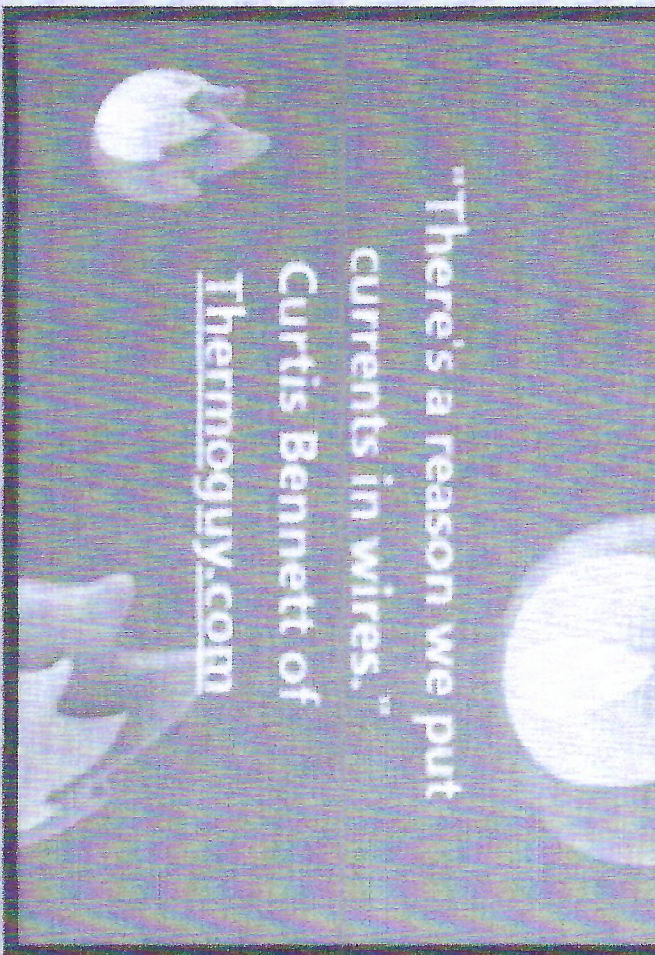

I had an electronic opt out meter that nearly killed my daughter, still radiates and has a switching mode power supply. You need an all mechanical analog meter.

they won't allow an opt out. The a*thats claim to be a member owned entity but then they force equipment on those members AND lock them out of public meetings + NOT member owned in function.

initially, there were no opt outs where I am in MD. A grassroots org brought it to a delegate, assisted in putting in an opt out bill. I testified at the hearings. The State legislature directed the power company to put in an opt out program, in part, because the science was not in regarding safety. Unfortunately, the opt out program did not require all analog mechanical meters. I fought long and hard to get the analog meter back just prior, I had bought an analog and was preparing to replace myself, with news media present. There is a site, freedomtakers that had letter templates for contacting other

Evidence for a connection between coronavirus disease-19 and exposure to ionizing electromagnetic radiation from wireless communications including 5G

David Smith of Carroll Electric confirmed that the meters measure the amount of electricity going into the main breaker of a house.

"It can't tell where or what parts of the house it's being used," he said in phone message. "It knows the peak demand, but where it's being used, it can't really tell."

Heard said Monday that Smart meters, while not a specific point in the complaint against Carroll Electric, could be a matter of concern because of the way the program is being implemented, not giving members a voice or a choice.

"We feel that's one of the many different areas where the management has ignored the concerns of member participation," he said.

Both sides have until Sept. 30 to file opening briefs and until Oct. 21 to file replies to those briefs.

After that date, a hearing will be set.

The docket of the complaint can be viewed on the Public Service Commission website at www.state.nj.us/psc/. The docket number is 11-077-C.

What gives anybody the right to file a lawsuit in my behalf?
